POLST and Advance Care Planning Tools

Mickey MacIntyre, Chief Program Officer
Compassion & Choices
About Compassion & Choices

Compassion & Choices is a national nonprofit organization with a proven record of successful client consultation, and of protecting and expanding the rights of patients.

We advocate strongly on behalf of persons with advanced or terminal illness to ensure that healthcare providers respect their wishes, whether their choice is to receive curative treatment and palliative care, or to refuse unnecessary or life-prolonging treatment.
What is POLST or MOLST?

Physician Orders for Life-Sustaining Treatment

OR

Medical Orders for Life-Sustaining Treatment
The POLST Paradigm

“The National POLST Paradigm is an approach to end-of-life planning based upon conversations between patients, loved ones, and medical providers. The POLST Paradigm is designed to ensure that seriously ill patients can choose the treatments they want and that their wishes are honored by medical providers.”

Source: www.polst.org National POLST Office at Oregon Health & Science University
Purpose of POLST

Developed for patients with one or more serious advanced illness. It is a conversation about:

1. The patient’s specific disease, treatment options (benefits and alternatives) and what will happen as the disease continues; AND

2. The patient’s goals of care and values

(source www.polst.org)
What happens next…

After a conversation - your health care provider will fill out the POLST/MOLST form with you, marking what treatments you do and do not want at the end of your life. Because it is a medical order – it means that your treatment wishes will be known and should be followed during a medical emergency, regardless of where you are.

(Source: www.polst.org)
POLST – is not a substitute for other planning tools...

- POLST is only for those diagnosed with serious advanced illness.
- POLST is intended to compliment your advance directive and NOT replace it.
- An advance directive is still needed in order to appoint a health care proxy.
- An advance directive is still needed in order to communicate your wishes in the future with regard to wanted or unwanted medical treatments.
Is POLST available in your state?

- There are programs in 17 states
- There are programs under development in 27 states
- There are only 8 states not doing anything related to POLST/MOLST at this time

(To see your state’s status please visit: www.polst.org/programs-in-your-state/)
**Montana Provider Orders For Life-Sustaining Treatment (POLST)**

**Section A**
Select only one box

**Treatment Options:** If patient does not have a pulse and is not breathing:

- [ ] Resuscitate (CPR)
- [ ] Do Not Resuscitate (DNR/No CPR)

If patient is not cardiopulmonary arrest, follow orders found in sections B and C

**Section B**
Select only one box

**Treatment Options:** If patient has a pulse and/or is breathing:

- [ ] Comfort Measures: Treat patient with dignity and respect. Keep patient warm and dry. Reasonable measures are to be made to offer food and fluids by mouth. Use medication, positioning, wound care and other measures to relieve pain and discomfort. Use oxygen, suction and manual treatment of airway obstruction as needed for comfort. DO NOT transfer to hospital for life-sustaining treatment. Transfer ONLY if comfort needs cannot be met in current location.
- [ ] Limited Additional Interventions: In addition to the care described above, use medical treatment, IV fluids and cardiac monitoring as indicated. Do not use intubation, advanced airway interventions or mechanical interventions. May consider use of less invasive airway support such as CPAP or BiPAP. **Transfer to hospital if indicated. Avoid Intensive Care.**
- [ ] Full Treatment: In addition to the care described above, use intubation, advanced airway interventions, mechanical ventilation and cardioversion as indicated. **Transfer to hospital if indicated. Include Intensive Care.**

**Antibiotics:**
- [ ] No antibiotics except if needed for comfort (i.e. urinary tract infection)
- [ ] No Invasive (IM/IV) antibiotics
- [ ] Aggressive treatment

**Medically Administered Nutrition:**
- [ ] No Feeding tube
- [ ] Feeding tube for defined trial period
- [ ] Feeding tube long-term

**Discussed with:**
- [ ] Patient/Resident
- [ ] Healthcare Agent/Surrogate
- [ ] Court appointed Guardian
- [ ] Other

**Signature of Physician/PA (mandatory) / Physician/PA Name (type or print) / Time and Date**

Use of original form is strongly encouraged. Photocopy, fax or electronic copy of signed POLST forms are legal and valid
### HIPAA PERMITS DISCLOSURE OF POLST TO OTHER HEALTH CARE PROVIDERS AS NECESSARY

**Section F**

Patient/Resident (Parent of Minor Child) Preferences as a Guide for this POLST Form

- I have given significant thought to life-sustaining treatment. I have expressed my preferences to my physician and/or health care provider(s). This document reflects my treatment preferences. The following have further information regarding my preferences.
  - Advance Directive: [ ] NO [ ] YES
  - Court-appointed Guardian: [ ] NO [ ] YES

- Review and discuss these orders if there is substantial change in my health status, such as:
  - Advanced progressive illness
  - Close to death
  - Extraordinary suffering

- Signature of Patient/Resident, Parent of minor or Guardian/Healthcare Agent (optional)

**COMMENTS:**

Updated: 03/30/11
You might be asking:

“Why Does Compassion & Choices care about POLST?”
A New Study in JAMA:

- Showed that from 2000-2009 treatment in acute care hospitals decreased but usage of the ICU increased. As did healthcare transitions in the last month of life.

- Usage of hospice care increased, but the data showed that 28% of those using it did so for three days or less.
An accompanying JAMA editorial concluded:

“The focus appears to be on providing curative care in the acute hospital regardless of likelihood of benefit or preferences of patients. If programs aimed at reducing unnecessary care are to be successful, patients’ goals of care must be elicited and treatment options such as palliative and hospice care offered earlier in the process than is the current norm.”
That’s why Compassion & Choices is working to:

- Bring these issues to the forefront of healthcare quality and system reform discussions;
- Support policies and programs that ensure a full range of wanted healthcare;
- Educate patients, the public and providers; and
- Reward providers who uphold patient self-determination and when necessary penalize those who provide unwanted treatment.
Compassion & Choices is dedicated to:

- Ensuring that a full range of medical treatments are freely available to patients.
- Improving the quality of discussions between patients and healthcare professionals.
- Ensuring compliance with advance directives.
We have lots of tools available to you!
Tools we recommend:

- State-Specific Advance Directives
- The Dementia Provision
- My Particular Wishes
- A Sectarian Health Care Directive
- Hospital Visitation Authorization
- Finding a Health Care Representative
POLST vs. Advance Directive

**Advance Directive:**
- For anyone 18 and older
- Provides instruction for future treatment
- Appoints a health care proxy
- Does not necessarily guide Emergency Medical Personnel
- Guides inpatient treatment decisions

**POLST**
- For persons with serious illness – at any age
- Provides medical orders for current treatment
- Guides actions by Emergency Medical Personnel when made available
- Guides inpatient treatment decisions
Tell us your stories!

- Have you experienced unwanted treatment?
- Has a family member been subject to unwanted treatment?
- Ask your friends, neighbors, etc. if they have experienced unwanted treatment!
- We need your story! This will help us end unwanted treatment.
