

Application and Planning for Post Conference Implementation

August 6, 2012

1. Much of the content in the Pioneer Network Conference sessions is focused on application for providers. How do you expect to use the information in your ongoing ombudsman work? How can you bridge or translate the content to LTCO work?
2. How will you share the information from the conference with other LTCO in your state?
3. Beyond the “feel good” aura of the conference sessions and information, what are specific strategies for applying the knowledge in the “tough” facilities or with the chronic issues?
4. How can the conference information be shared with volunteer ombudsmen, including its application to working with challenging facilities or with residents who have dementia or mental illness?
5. How will you share the conference information with providers and with your state’s Culture Change Coalition or LANE?
